DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

i) Method of treating contaminated material containing a halogenated compound which method includes maintaining ORP of -350mV for at least 5 days using a combination of a reducing agent and a water-soluble organic nutritional liquid.

ii) Method of treating contaminated material containing a halogenated compound which method includes maintaining ORP of -350mV for at least 5 days using a metal alloy reducing agent.

iii) Method of treating contaminated material containing a halogenated compound which method includes maintaining ORP of 130mV for at least 5 days using a water soluble reducing agent.

iv) Method of treating contaminated material containing a halogenated compound which method includes using a metal alloy reducing agent and a water-soluble organic nutritional liquid.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 1744

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 41-43, 45-47, 53-58, 61 and 65 correspond to species i).

Claims 44, 48-52, 64 and 67 correspond to species ii).

Claims 59, 60, 62, 63, 68 and 69 correspond to species iii).

Claim 66 corresponds to species iv).

The following claim(s) are generic: There are no generic claims.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The special technical feature of species i) (maintaining ORP of -350mV for at least 5 days using a combination of a reducing agent and a water-soluble organic nutritional liquid is not required of the claims corresponding with species ii), iii) or iv).

The special technical feature of species ii) (maintaining ORP of -350mV for at least 5 days using a metal alloy reducing agent is not required of the claims corresponding with species i), iii) or iv).

Art Unit: 1744

The special technical feature of species iii) (maintaining ORP of 130mV for at least 5 days using a using a water soluble reducing agent is not required of the claims corresponding with species i), ii) or iv).

The special technical feature of species iv) treating contaminated material containing a halogenated compound an using a metal alloy reducing agent and a water-soluble organic nutritional liquid is not required of the claims corresponding with species i), ii) or iii).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Beisner whose telephone number is 703-308-4006. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:40am to 4:10pm.
